## **DETAILED ACTION**

## Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 4,576,313 to Smith in view of US 4,322,019 to Smith.

Smith ('313) show a discharge device and a package with liquid product as seen in Figs.

3, having a package 200 with synthetic walls 201, first synthetic connecting member and spacer

210, second synthetic connecting member 160, the first and second connecting members are

connected to each other, the first connector has a hole 215 that is closed by closing member 166,

the second connecting member has a tubular member 170 that penetrates the container and the

first connector, the hole in the connecting member has five uniformed walls that are concave and

arcuate relatively to the center of the hole, the tubular member of the connecting member has a

corresponding number of corners and edge portions as the connecting member one, see Fig. 10.

In reference to claim 3, see column 3, line 26-33.

In reference to claim 5, see column 10, lines 60-62.

Smith ('313) is silent about the wall of the tubular member being concave relative to the dispensing hole.

Application/Control Number: 10/532,000 Page 3

Art Unit: 3754

Smith ('019) shows a piercing element 180; see Figs. 9 and 10, having concave walls relative to the dispensing hole. It would have been obvious to a person with ordinary skill in the art at the time the invention was made to modify the device of Smith ('313) by including concave wall on the piercing tube to improve the product flow between the piercing tube and the flexible walls of the container after the tube has pierced the container as taught by Smith ('019).

## Response to Arguments

3. Applicant's arguments with respect to claims 1-9 have been considered but are moot in view of the new ground(s) of rejection.

## Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MELVIN A. CARTAGENA whose telephone number is (571)272-4924. The examiner can normally be reached on T-F (7:30AM to 6:00 PM).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kevin P. Shaver can be reached on (571) 272-4720. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
